3.6 Medicated Feed Mixing Record

Date (d/m/y)	Pen or Barn Number	Type of Mix	Amount of Mix	Medication Used	Amount of Medication in Finished Feed (mg/kg)	Withdrawal Time	Mixed By (initials)	Flushing	
								Date (d/m/y)	Inititals

All mixes must be recorded.

The mixer must be flushed according to Good Production Practices medicated feed mixing protocol.

See the medicated feed mixing protocol regarding the sequence in which components of the ration are added to mixes as well as duration of mixing.

The material and amount of flush, the duration of the flush and the disposal of the used flush are also listed in that protocol.
